

SAFE HANDS

your health in safe hands

Take care of your employees' & customers' health and safety!

SAFE HANDS

SAFE HANDS - line of dispensers that was created to ensure cleanliness and hand hygiene in all facilities, where the key issue is the safety of staff and customers.

The main purpose of Safe Hands is to limit the use of hands, our solution allows the liquid to be dispensed by pressing the lever with the elbow or foot.

To ensure durability and aesthetics of dispensers, the devices are made of stainless steel. The geometric form, moving variants and details increasing the functionality of the devices allow you to use them in all conditions.

Safe Hands line includes devices adapted to the size of the object and the expected intensity of use. Each store, office, gas station or gastronomic point will find a dispenser suitable for its needs.

Will **SAFE HANDS** work out in my business?

large stores and convenience stores

bakeries and confectioneries
